Design

The design came from the streets of Berlin with a clear focus on quality. The product is made of steel construction and a white powder coating finish with optional other colors. It is truly a unique and clean design that attracts any audience!

Full HD Resolution

The transparent LCD is native 1920 x 1080 and a 16:9 aspect ratio on most models. This allows for an amazing platform for content development which will enhance the user engagement.

Transparent Technology

The integrated transparent display allows the user to see through the digital screen like a piece of glass letting the user to experience the product with unique content drive at the forefront.

USB Media Playback

You will not require an external media source when using the internal USB port. Play and Loop video files including .MP4, .MPG, .AVI, .MOV and more!
